

Online Examinations (Even Sem/Part-I/Part-II Examinations 2020 - 2021)

Course Name - Ocular Disease II

Course Code - BOPT0403

* You can submit the form ONLY ONCE.

* Fill the following information for further process.

* Required

1. Email *

2. Name of the Student *

3. Enter Full Student Code *

4. Enter Roll No *

5. Enter Registration No *

6. Enter Course Code *

7. Enter Course Name *

8. *

Mark only one oval.

- Diploma in Pharmacy
- Bachelor of Pharmacy
- B.TECH.(CSE)

- M.SC.(MM)
- B.A.(Eng)

Answer all the questions. Each question carry one mark.

9. 1. Most common type cataract in adults

Mark only one oval.

- Nuclear
- Cortical
- Zonular
- Morgagnian

10. 2. Most common congenital or developmental cataract

Mark only one oval.

- Lamellar
- Blue Dot
- Total nuclear
- Rubella cataract

11. 3. Most common congenital or developmental cataract presenting with vision impairment

Mark only one oval.

- Blue Dot
- Coronary
- Lamellar
- Total nuclear

12. 4. Zonular cataract got the name because

Mark only one oval.

- It involves Zonules of Zinn
- It involves different zones of lens
- It involves nucleus of lens
- It is bilateral

13. 5. Refractive error associated with Nuclear cataract

Mark only one oval.

- Hypermetropia
- Myopia
- Astigmatism
- Presbyopia

14. 6. Pigment accumulate in nuclear cataract

Mark only one oval.

- Visual pigment
- Melanin
- Adinochrome
- Urochrome

15. 7. Iris shadow is seen in which stage of cortical cataract

Mark only one oval.

- Incipient stage
- Hyper mature stage
- Mature stage
- Immature stage

16. 8. Sunset syndrome is due to

Mark only one oval.

- Night blindness
- Immature cataract
- Subluxated cataractous lens
- Subluxated IOL

17. 9. In bipolar cataract

Mark only one oval.

- Both eye anterior polar cataract
- Both eye posterior polar cataract
- One eye anterior polar and other eye posterior polar
- Anterior and posterior polar in same eye

18. 10. In intra capsular cataract extraction, which part of the capsule is left behind

Mark only one oval.

- Anterior
- Posterior
- Both of these
- None of these

19. 11. Chlorpromazine-induced cataract is

Mark only one oval.

- Anterior polar
- Posterior polar
- Anterior subcapsular
- Posterior subcapsular

20. 12. Cataract associated with long-term use of miotics

Mark only one oval.

- Anterior polar
- Posterior polar
- Anterior subcapsular
- Posterior subcapsular

21. 13. All are causes of posterior subcapsular cataract except

Mark only one oval.

- Complicated cataract
- Steroid induced cataract
- Chlorpromazine cataract
- Traumatic cataract

22. 14. Choice of treatment for aphakia

Mark only one oval.

- Spectacle
- Contact lens
- IOL implantation
- LASIK

23. 15. Phacotopic glaucoma occur due to

Mark only one oval.

- Swollen cataractous lens
- Leakage of lens protein
- Subluxated or dislocated hypermature lens
- Rupture of posterior capsule in ECCE

24. 16. Retinal detachment is more common after

Mark only one oval.

- ICCE
- ECCE
- SICS
- MICS

25. 17. After cataract will not occur in

Mark only one oval.

ICCE

ECCE

SICS

MICS

26. 18. Post operative astigmatism is more after

Mark only one oval.

ICCE

ECCE

SICS

MICS

27. 19. Post operative astigmatism is more commonly

Mark only one oval.

With the rule

Against the rule

Oblique

Bioblique

28. 20. Rosette-shaped cataract is a feature of

Mark only one oval.

- traumatic cataract
- diabetic cataract
- coronary cataract
- complicated cataract

29. 21. Snow flakes cataract is found in cases with

Mark only one oval.

- gout
- rheumatoid arthritis
- diabetes mellitus
- hypothyroidism

30. 22. Second sight is seen in

Mark only one oval.

- Aphakia
- After cataract
- Senile Nuclear cataract
- Senile Cortical cataract

31. 23. Immature Nuclear cataract changes the refraction of the eye into

Mark only one oval.

- Myopia
- Hypermetropia
- Astigmatism
- No change

32. 24. The type of laser used to treat Posterior capsule opacification

Mark only one oval.

- Yag laser
- Argon laser
- Diode laser
- Excimer laser

33. 25. Most common cause of dimintion of vision after ECCE is

Mark only one oval.

- Cystoid macular edema
- Posterior capsule opacification
- Corneal decompansation
- Retinal detachment

34. 26. Sun-set syndrome occurs due to

Mark only one oval.

- inferior subluxation of IOL
- Nuclear cataract
- dislocation of IOL into vitreous
- Lenticular sclerosis

35. 27. Fincham's test differentiates cataract from

Mark only one oval.

- Retinal detachment
- uveitis
- glaucoma
- diabetic retinopathy

36. 28. Which of the following conditions can cause uniocular diplopia

Mark only one oval.

- subluxation of IOL
- incipient cataract
- keratoconus
- all the above

37. 29. All are causes of Inherited Ectopia Lentis except

Mark only one oval.

- Marfan's syndrome
- Weill-Marchesani syndrome
- Homocystinuria
- Hypermature cataract

38. 30. Subluxated lens without vitreous involvement is removed by

Mark only one oval.

- ECCE
- ICCE
- Phacoemulsification
- All

39. 31. Cryoextraction of cataract is done in

Mark only one oval.

- ECCE
- ICCE
- Phacoemulsification
- All

40. 32. Main cause of painless progressive loss of vision in adults

Mark only one oval.

- Cataract
- Open angle glaucoma
- ARMD
- Progressive myopia

41. 33. The Mydriasis Provocative Test is a test for which glaucoma

Mark only one oval.

- POAG
- PACG
- NTG
- All of these

42. 34. Dark room test is a provocative test for

Mark only one oval.

- POAG
- PACG
- NTG
- None of these

43. 35. Mydriatics are contraindicated if the anterior chamber is

Mark only one oval.

- Deep
- Shallow
- Normal
- Irregular

44. 36. Pachymetry is done in

Mark only one oval.

- Glaucoma
- Fuch's dystrophy
- Before LASIK
- All of these

45. 37. Treatment of choice for the other eye in primary narrow angle glaucoma is

Mark only one oval.

- Trabeculectomy
- Laser iridotomy
- Laser trabeculoplasty
- Iridectomy

46. 38. 100 days glaucoma is seen in:

Mark only one oval.

- Central retinal artery occlusion
- Central retinal vein occlusion
- Neovascular glaucoma
- Steroid induced glaucoma

47. 39. In early glaucomatous cupping, disc is:

Mark only one oval.

- Round
- Oval vertically
- Oval horizontally
- Pinpoint

48. 40. The eyes susceptible to angle closure glaucoma are:

Mark only one oval.

- Hypermetropic eye
- Myopic eye
- Astigmatic eye
- Pseudophakic eye

49. 41. Beta Blockers lower IOP mainly by

Mark only one oval.

- Decreased aqueous production
- Increased aqueous drainage
- Lower episcleral venous pressure
- All of above

50. 42. Rapid change in presbyopic correction is a classical feature of

Mark only one oval.

- Retinal detachment
- open angle glaucoma
- closed angle glaucoma
- Senile Cataract

51. 43. Coloured halos around light are not seen in

Mark only one oval.

- early stages of closed angle glaucoma
- early stages of cataract
- acute mucopurulent conjunctivitis
- Corneal aberrations

52. 44. In Van Herick slit-lamp grading, closed angle is graded as

Mark only one oval.

- Grade 0
- Grade 1
- Grade 4
- None of the above

53. 45. Increased ocular pressure in Buphthalmos causes all the following EXCEPT

Mark only one oval.

- stretching of sclera
- corneal vascularisation
- corneal curvature prominence
- Rupture of Descemet's membrane

54. 46. All are causes of Sudden painless loss of vision except

Mark only one oval.

- Central serous retinopathy
- Optic neuritis
- Primary Open Angle Glaucoma
- Nonischaemic central retinal vein occlusion

55. 47. Glaucoma which is also known as Chronic Simple Glaucoma

Mark only one oval.

- Primary Angle Closure Glaucoma
- Primary Open Angle Glaucoma
- Normal Tension Glaucoma
- Congenital Glaucoma

56. 48. Test not used in glaucoma evaluation

Mark only one oval.

- Pachymetry
- Perimetry
- Keratometry
- Ophthalmoscopy

57. 49. Night blindness may occur in all except

Mark only one oval.

- Vitamin A deficiency
- High myopia
- Angle closure glaucoma
- Oguchis disease

58. 50. POAG field changes may include all the following except:

Mark only one oval.

- Arcuate scotoma.
- Hemianopia
- Enlarged blind spot
- Tubular vision

59. 51. All the following are features of POAG except:

Mark only one oval.

- Tubular vision
- Enlarged blind spot
- General depression of isopters
- Loss of central fields

60. 52. In acute angle closure glaucoma the pupil is:

Mark only one oval.

- Rounded, irreactive and dilated
- Pin point constricted
- Oval, vertically dilated
- Normal sized, reactive

61. 53. Early features of chronic simple glaucoma include all except:

Mark only one oval.

- Mild headache
- Acute onset
- Frequent change of presbyopic glasses
- Clear cornea

62. 54. Applanation tonometry is based on

Mark only one oval.

- Imbert-Fick principle
- Goldman's equation
- Perkins principle
- Principle of indentation

63. 55. End stage of all glaucomas

Mark only one oval.

- Absolute glaucoma
- Acute congestive glaucoma
- Total glaucoma
- None of these

64. 56. Bayoneting of blood vessels is a sign of

Mark only one oval.

- Diabetic retinopathy
- ARMD
- Glaucoma
- Retinal detachment

65. 57. Which of these is not a likely cause of painful red eye in a patient?

Mark only one oval.

- Open angle glaucoma
- Closed angle glaucoma
- Conjunctivitis
- Herpes simplex

66. 58. Neuosensory part of retina contains how many layers

Mark only one oval.

- 7
- 8
- 9
- 10

67. 59. Retinal layer which is close to vitreous body

Mark only one oval.

- Pigment epithelium
- External limiting membrane
- Internal limiting membrane
- Nerve fibres layer

68. 60. Retinal layer which is close to choroid

Mark only one oval.

- Pigment epithelium
- External limiting membrane
- Internal limiting membrane
- Nerve fibres layer
