Answer all the questions. Each question carry one mark.

9. 1. Which of the following is not a correct pairing of milestone and its age of developing?

Mark only one oval.

- 5 months- holding of objects with both hands
- 6 months- transfer of objects
- 6 months- tripod sitting
- 14 months- pincer grasp

10. 2. Bidextrous grasp is seen at what age?

Mark only one oval.

4 months

5 months

6 months

7 months

11. 3. Protein in Cow's milk in comparison to human milk is:

Mark only one oval.

Double

Triple

Quadruple

Same

12. 4. Amount of protein present in 100 ml of breast milk is

Mark only one oval.

2.2 g

1.1 g

0.55 g

3.3 g

13. 5. Severe acute malnutrition as per WHO criteria

Mark only one oval.

- Weight for age-2 SD less than median
- Weight for height-2 SD less than median
- Weight for age-3 SD less than median
- Weight for height-3 SD less than median

14. 6. Diphtheria in a child is characterized by all of the following except

Mark only one oval.

- Incubation period is mostly 2-5 days
- Pharyngo-tonsillar diphtheria commonly presents as sore throat
- Membrane can cover,pharyngeal walls,tonsils,uvula,soft palate & glottis
- Fever,malaise & tachycardia

15. 7. A 5-year-old child presents with fever & altered sensorium for 3 days.On examination,he has oral ulcers & lesions on his palm.What is most likely causative organism?

Mark only one oval.

- Staphylococcus aureus
- Measles virus
- Rubella virus
- Picorna virus

16. 8. A 5-year-old unimmunized child developed diphtheria. He has a 3 years old sibling contact, who received last booster 18 months back. What to do with the contact?

Mark only one oval.

- Two doses of polysaccharide vaccine
- Two doses of conjugate vaccine
- Single dose of toxoid vaccine
- No vaccine needed

17. 9. Which vaccine is to be given every year

Mark only one oval.

- Hepatitis A
- Pneumococcal
- Influenza
- Chickenpox

18. 10. The weight of the child at 3 years is usually-times the birth weight

Mark only one oval.

- 3
- 4
- 5
- 7

19. 11. Average gain of length in first year is

Mark only one oval.

- 25 cm
- 50 cm
- 75 cm
- 100 cm

20. 12. Maximum growth spurt in boys occurs at

Mark only one oval.

- 8-10 years
- 10-11 years
- 12-13 years
- 14-15 years

21. 13. Which of the fontanelle is the last to close

Mark only one oval.

- Posterior fontanelle
- Anterior fontanelle
- Mastoid fontanelle
- Sphenoidal fontanelle

22. 14. Eruption of 1st molar permanent tooth occurs at the age of

Mark only one oval.

- 4-5 years
- 6-7 years
- 7-8 years
- 8-10 years

23. 15. Which of the following are the first incisors to erupt in an infant?

Mark only one oval.

- Lower central
- Lower lateral
- Upper central
- Upper lateral

24. 16. Milk teeth-total [no.in](#) human being

Mark only one oval.

- 20
- 28
- 32
- 24

25. 17. Earliest indication of sexual maturation in females

Mark only one oval.

- Menarche
- Thelarche
- Pubarche
- Genital maturation

26. 18. What is Thelarche?

Mark only one oval.

- Pubertal breast enlargement in boys
- Breast enlargement in pregnancy
- Hormone related breast enlargement in girls
- Post hormonal therapy breast enlargement in post menopausal females

27. 19. GH deficiency is diagnosed by

Mark only one oval.

- Bone age less than chronological age
- Bone age more than chronological age
- Bone age equal to chronological age
- Ratio of upper to lower segment of body is increased

28. 20. Which of the following statement regarding 'familial short stature' is incorrect ?

Mark only one oval.

- Puberty is delayed
- Bone age is normal
- Growth is slow from birth
- Growth hormone levels are normal

29. 21. Which of the following is a contradiction for breast feeding?

Mark only one oval.

- Hepatitis A
- Hepatitis B
- CMV
- Active untreated TB

30. 22. Breast milk storage in a refrigerator is up to

Mark only one oval.

- 4 hours
- 8 hours
- 12 hours
- 24 hours

31. 23. Milk is deficient in

Mark only one oval.

- Iron & Vit C
- Iron & Vit A
- Phosphrus & Vit C
- Phosphorus & Vit A

32. 24. Colostrum is rich in

Mark only one oval.

- IgA
- IgE
- IgG
- IgM

33. 25. Compared with cow's milk, mother's milk has more?

Mark only one oval.

- Lactose
- Vitamin D
- Protein
- Fat

34. 26. Breast milk is maximum at

Mark only one oval.

1-2 months

3-4 months

5-6 months

7-8 months

35. 27. Complimentary feeding starts at

Mark only one oval.

1 month

3 months

6 months

12 months

36. 28. Hind milk is richer in

Mark only one oval.

Carbohydrate

Protein

Fat

Minerals

37. 29. Specific sign of Kwashiorkor is

Mark only one oval.

- Pitting edema
- Weight loss
- Flat sign
- Muscle wasting

38. 30. Dose of treatment of Vitamin A deficiency in 10 kg child who is 2 years old is

Mark only one oval.

- 5000 IU
- 100,000 IU
- 150,000 IU
- 200,000 IU

39. 31. Best marker for chronic PEM is

Mark only one oval.

- Weight for age
- height for age
- weight for height
- head circumference

40. 32. According to WHO, severe acute malnutrition in children is defined as

Mark only one oval.

- Weight for height Z Score < -3
- Weight for height Z Score < -2
- Weight for height Z Score < -1
- Weight for height Z Score between -2 and -3

41. 33. All are seen in marasmus except

Mark only one oval.

- hepatomegaly
- Muscle wasting
- Voracious appetite
- Weight loss

42. 34. flag sign is seen in

Mark only one oval.

- kawashiorkor
- beriberi
- pallegra
- marasmus

43. 35. Kwashiorkor , not an essential criteria

Mark only one oval.

- Edema
- growth retardation
- hepatomegaly
- apathy

44. 36. in kwashiorkor , the letter 'k' is post-fixed to denote

Mark only one oval.

- weight for height
- skin changes
- Edema
- muscle wasting

45. 37. mostly death in PEM is due to all except

Mark only one oval.

- hypothermia
- CCF
- worm infestation
- Electrolyte imbalance

46. 38. acute complication of PEM

Mark only one oval.

- hypothermia
- hypoglycemia
- hypokalemia
- all of these

47. 39. recommended daily dose of iodine in child is

Mark only one oval.

- 120-200 μg
- 90-120 μg
- 30-60 μg
- 500 μg

48. 40. dose of vit-A for a 18 month old baby, with keratomalacia, weighing 10 kg is

Mark only one oval.

- 50,000 IU
- 1,00,000 IU
- 2,00,000 IU
- 5,00,000 IU

49. 41. First clinical sign of vitamin A deficiency

Mark only one oval.

- poor growth
- conjucival sclerosis
- hydrocephalus
- phrynoderma

50. 42. thiamine deficiency causes

Mark only one oval.

- pellagra
- beri-beri
- keshan's disease
- rickets

51. 43. stage X3B refers to the following in the classification of vit-A deficiency

Mark only one oval.

- night blindness
- corneal xerosis
- conjunctival xerosis
- keratomalacia

52. 44. A two year old child was brought to the OPD by his grandparents with complaints of not eating anything. On examination her weight is 11.5 kg (50th percentile of normal) and height is 75 percentile. What is the management?

Mark only one oval.

- Advise multivitamin Tonic
- Force to eat
- Investigate for UTI
- Ask parents to stop worrying

53. 45. Which of the following acts a one year old child can perform?

Mark only one oval.

- Sits down from standing position
- Drinks from cup
- Speaks one or two words with meaning
- Rings bell purposefully

54. 46. Which of the following prenatal diagnosis is possible for all of following condition except:

Mark only one oval.

- Sickle cell trait
- Beta Thalassemia
- Ectodermal dysplasia
- Duchennes muscular dystrophy

55. 47. A 7 year old boy with reduced height and weight for age for past one year is likely to have which of the following condition?

Mark only one oval.

- Malnutrition
- Lymphoma
- Chronic infection
- Measles

56. 48. Intra uterine growth retardation can be caused by all of the following agent except:

Mark only one oval.

- Nicotine
- Alcohol
- Propranolol
- Phenothiazine

57. 49. Which of the following childhood disorder improves with increase in age?

Mark only one oval.

- Conduct disorder
- Emotional problems
- Temper tantrum
- Sleep disorder

58. 50. A normal infant sits briefly leaning forward on her hands, reaches for and grasps a cube and transfers it from one hand to another hand. She babbles but cannot wave bye-bye nor can she grasp objects with the finger and thumb. What might be her age?

Mark only one oval.

- 4 months
- 10 months
- 7 months
- 14 months

59. 51. Which year Two carpal bones are radiologically seen in the wrist X-ray of most of the children?

Mark only one oval.

- 1 year
- 2 years
- 3 years
- 4 years

60. 52. Foetal Respiratory movements occur earliest at what weeks?

Mark only one oval.

- 12 wks
- 16 wks
- 20 wks
- 11 wks

61. 53. The antenatal diagnosis of all of the following conditions is feasible except in which of the following?

Mark only one oval.

- Huntington's chorea
- Down's syndrome
- Severe combined immunodeficiency syndrome
- Anencephaly

62. 54. Head control is possible in an infant by which month?

Mark only one oval.

- 1
- 2
- 3
- 6

63. 55. IQ between 50-70 indicates which of the following classification?

Mark only one oval.

- Mild mental retardation
- Moderate retardation
- Severe retardation
- Profound retardation

64. 56. A 18-month old baby presents with recurrent episodes of excessive crying followed by cyanosis, unconsciousness and occasional seizures since 9 months of age. What is the most likely diagnosis is?

Mark only one oval.

- Epilepsy
- Anoxic spells
- Breath holding spells
- Vasovagal attack

65. 57. Which among the following is not expected in a 3 year old child

Mark only one oval.

- Draw a circle
- Talk in sentence
- Climb down stairs
- hop 5 steps

66. 58. What is the normal heart rate at birth?

Mark only one oval.

- 120-160/min
- 100-120
- 160-180
- is always less than 100

67. 59. Fetal growth is maximally affected by which of the following hormone?

Mark only one oval.

- Insulin
- Growth Hormone
- Cortisol
- Thyroxine

68. 60. A child can walk up and down the stairs alternating his feet by

Mark only one oval.

- 12 months
- 24 months
- 36 months
- 48 months
