■ **India Rejects Global Hunger Index Report 2022**

India has rejected the Global Hunger Index Report 2022 that ranks India at 107 among 121 countries in terms of prevalence of hunger. In a statement, Ministry of Women and Child Development said, consistent effort is yet again visible to taint India's image as a nation that does not fulfill the food security and nutritional requirements of its population. The Ministry said that the index is an erroneous measure of hunger and suffers from serious methodological issues; is disconnected from ground reality and chooses to deliberately ignore efforts made by the Government to ensure food security for the population especially during the COVID Pandemic.
