■ **Launch of India-Bhutan Satellite is a Testament of Special Relationship with Bhutan: PM**

Prime Minister Shri. Narendra Modi has congratulated ISRO on the successful launch of PSLV C54 mission. The India-Bhutan SAT, jointly developed by India and Bhutan was launched into space on 26th November by ISRO's Polar Satellite Launch Vehicle. India successfully placed into orbit the Indo-French Ocean Observation Satellite EOS-6 and eight other Nano satellites through PSLV-C54. India's PSLV C54 was launched from Satish Dhawan Space Centre, Sriharikota. In his message, Prime Minister Modi said the EOS-06 satellite will help in optimising utilisation of maritime resources. He added that the launch of three satellites from Indian companies Pixxel Space and Dhruva Space heralds the beginning of a new era, where Indian talent in space technology can be fully realised.
