

**BRAINWARE UNIVERSITY**

**Term End Examination 2018 - 19**

**Programme – Master of Technology in Computer Science & Engineering**

**Course Name – Advanced Data Structures**

**Course Code – MCSE010401**

(Semester – 1)

**Time allotted: 3 Hours**

**Full Marks: 70**

[The figure in the margin indicates full marks. Candidates are required to give their answers in their own words as far as practicable.]

**Group –A**

(Multiple Choice Type Questions)

10 x 1 = 10

1. *Choose the correct alternative from the following*
  - (i) What is the best case time complexity of insertion sort?
 

a. $O(1)$	b. $O(n)$
c. $O(n \log n)$	d. $O(n^2)$
  - (ii) What is the equivalent postfix expression for  $d / (e + f) + b * c$ ?
 

a. defbc/++*	b. def+/bc+*
c. def+/bc*+	d. None of these
  - (iii) What is the time complexity of binary search?
 

a. $O(n^2)$	b. $O(n)$
c. $O(\log n)$	d. $O(n \log n)$ .
  - (iv) What is the actual string corresponding the postfix form of a string  $ABC + - D$ ?
 

a. $(A - (B + C)) * D$	b. $((A - B) + C) * D$
c. $((A + B) - C) * D$	d. $(A + (B - C)) * D$
  - (v) The values in a Binary Search Tree can be sorted in ascending order by using which of the following traversals?
 

a. Pre-order	b. In-order
c. Post-order	d. Level-order

- (vi) In what tree, for every node the heights of its left sub-tree and right sub-tree differ at least by one?
  - a. Binary search tree
  - b. AVL tree
  - c. Complete tree
  - d. Threaded binary tree
- (vii) Fibonacci function  $fib(n) = fib(n-1) + fib(n-2)$  is an example of
  - a. Linear Recursion
  - b. Binary Recursion
  - c. Non-linear Recursion
  - d. Mutual Recursion
- (viii) What is the fastest sorting algorithm for an almost already sorted array?
  - a. Quick sort
  - b. Merge sort
  - c. Selection sort
  - d. Insertion sort
- (ix) A linear list that allows elements to be added or removed at either end but not in the middle is called
  - a. Stack
  - b. Queue
  - c. Priority queue
  - d. None of these
- (x) A complete binary tree with  $n$  leaves contains
  - a.  $n$  nodes
  - b.  $\log_2 n$  nodes
  - c.  $2n - 1$  nodes
  - d.  $2^n$  nodes

### Group – B

(Short Answer Type Questions)

3 x 5 = 15

Answer any *three* from the following

- 2. What is the difference between Static and Dynamic Data Structure? Explain with an example. 5
- 3. Write an algorithm or a function in C Programming Language to reverse a Singly-linked list physically. The error conditions are to be handled properly. 5
- 4. Define and explain Hashing. 5
- 5. Write down the Formation algorithm of Binary Search Tree. 5
- 6. (a) What is Open Addressing? 1
- (b) Where it is used? 2
- (c) Explain with an example. 2

**Group – C**

(Long Answer Type Questions)

3 x 15 = 45

Answer any *three* from the following

- |     |     |   |     |
|-----|-----|---|-----|
| 7.  | (a) | Define the ADT for stack.   | 2   |
|     | (b) | Show the implementation of the stack data structure using linked list.  | 6   |
|     | (c) | What is Circular queue?   | 2   |
|     | (d) | Write <i>Q</i> -insert algorithm for the circular queue.  | 5   |
| 8.  | (a) | Show the steps in creation of a height balanced binary AVL TREE using insertion of items in the following order (show all the balancing steps)<br><i>(March, May, November, August, April, January, December, July, February, June, October, September)</i> | 10  |
|     | (b) | What do you mean by a <i>B</i> -Tree and what are the uses of such a tree in data structures?   | 5   |
| 9.  | (a) | Define Bruce Force Pattern Matching.  | 5   |
|     | (b) | Explain briefly QuadTrees   | 5   |
|     | (c) | Explain ReHashing with Examples   | 5   |
| 10. | (a) | What are the applications where you will prefer hash tables to other data structures?   | 4   |
|     | (b) | What do you mean by collision? How is it handled?   | 7   |
|     | (c) | Write the recursive function for the problem of Tower of Hanoi problem.   | 4   |
| 11. |     | Write a short note of any three of the following.   | 3x5 |
|     | (a) | Radix sort.   |     |
|     | (b) | Asymptotic Notation.  |     |
|     | (c) | Tail recursion.   |     |
|     | (d) | Threaded binary tree.   |     |
|     | (e) | BFS vs DFS.   |     |
