■ India, US Launch RETAP to Boost Renewable Energy Technology Innovation

In a significant move toward advancing renewable energy technology, India and the United States have unveiled the Renewable Energy Technology Action Platform (RETAP) as part of their Strategic Clean Energy Partnership. This collaborative initiative, arising from discussions between India's Ministry of New and Renewable Energy and the US Department of Energy (DOE) on August 29, aims to enhance cooperation in renewable energy, prioritising technology-driven outcomes. RETAP's primary focus areas include green and clean hydrogen, wind energy, and long-duration energy storage solutions. However, the platform will also explore

Prospects

prospects in geothermal energy, ocean/tidal energy, and other emerging technologies.
