

■ "FloodWatch" Mobile App Launched to Provide Real-Time Flood Information

The Central Water Commission (CWC) has unveiled "FloodWatch" mobile application for enhancing flood preparedness and awareness. The app delivers up-to-date

flood-related information and forecasts for up to 7 days in real-time to the public. The homegrown, user-friendly app offers both readable and audio broadcasts, catering to users in two languages, English and Hindi. Among its key attributes is an Interactive Map that facilitates users in viewing CWC Flood Forecasts (up to 24 hours) or Flood Advisories (up to 7 days). Users can select stations directly on the map or search for specific locations, seamlessly zooming in for detailed information.
