

India is a Reliable Semiconductor Supplier: PM

Prime Minister Shri Narendra Modi urged international private players to invest in India's semiconductor sector during the 'Semicon India 2023' conclave in Gandhinagar. He emphasised India's stable government, expanding infrastructure, technology development, and abundant talent pool, making it an attractive destination for semiconductor investments. The government is providing 50% financial assistance to foster a vibrant semiconductor ecosystem. Over 300 educational institutes offer specialised academic courses dedicated to the semiconductor sector, creating a skilled pool of engineers. The three-day conclave, organised by the Ministry of Electronics and Information Technology, showcased India's semiconductor strategy, propelling the nation to the forefront of the industry.
