### ■ Chandrayaan-3 Launched Successfully

ISRO successfully launched a 642-tonne heavy lift rocket LVM3 carrying Chandrayaan - 3 satellite from Sriharikota on July 14. India's yet another historical mission to the moon began after the completion of the three launch stages of take off. Hailing the relentless dedication of India's scientists on the launch of Chandrayaan-3, the Prime Minister, Shri Narendra Modi tweeted, "Chandrayaan-3 scripts a new chapter in India's space odyssey. It soars high, elevating the dreams and ambitions of every Indian. This momentous achievement is a testament to our scientists' relentless dedication. I salute their spirit and ingenuity!"
