■ **G20 Development Ministers Conclave Adopts India's Action Plan for SDGs**

The G20 Development Ministers conclave held in Varanasi has approved a comprehensive seven-year action plan on June 13 proposed by India to accelerate progress on the Sustainable Development Goals (SDGs) by G20 countries. The action plan emphasises the importance of leaving no one behind and putting sustainable development at the centre of international cooperation. Efforts to achieve sustainable development in economic, social, and environmental dimensions have been prioritised, with a call for ambitious and collective actions to address vulnerabilities and imbalances, particularly in the developing countries and small island states. India, holding the G20 presidency, highlighted its role as the voice of the global South, advocating for bridging the financial gap and addressing debt challenges in SDG attainment.
