■ India, Israel Forge New Path in Industrial Research & Development Cooperation

India and Israel have signed a landmark Memorandum of Understanding on Industrial Research and Development Cooperation, with a focus on several key technology areas. The agreement covers a range of sectors, including aerospace, electronics instrumentation, civil infrastructure and engineering, environment, mining, chemicals, petrochemicals, and agriculture. The Multi-Sectoral Agreement was signed between the Council of Scientific and Industrial Research and the Directorate of Defense Research and Development, Ministry of Defence of Israel, at a ceremony held in New Delhi. The MoU will enable both countries to leverage each other's strengths in key sectors, driving growth and progress in the years to come.
