

(Amendment) Bill, 2022.

■ India Approves Nasal COVID-19 Vaccine as Booster Dose

The Indian government has approved Bharat Biotech's nasal COVID-19 vaccine for use as a booster dose for individuals aged 18 and older. The vaccine, known as BBV154, will initially be available at private hospitals and will be introduced on the Co-WIN platform. The approval for the vaccine follows a recent surge in COVID-19 cases in China and other countries.
