ABOUT THE BWU LIBRARY

The Brainware University Library serves as a vital knowledge resource center, boasting a vast collection of materials that has recently increased from 38,932 to 42,411 books in last six months. This extensive collection includes books, numerous national and international journals, magazines, project reports, subject dictionaries, fiction and non-fiction works, biographies, rare and valuable texts, manuscripts, career guides, ready reference materials, theses and dissertations, and previous years' question papers. With comprehensive cataloguing and detailed records, students can easily navigate a user-friendly index, Web-OPAC, to find what they need. To enhance user experience, the library utilizes an RFID system for easy circulation and footfall counting, making it more efficient for students and staff to access resources.

Additionally, the Dept. libraries are focused on specific disciplines like Pharmaceutical Technology, Law, Nursing, Allied Health Sciences and Biotechnology. Together, the Central Library and these departmental libraries offer an extensive array of resources. The integrated library system used at Brainware University Library, is KOHA (version 20.11), while the DSpace institutional repository software has been employed to manage and preserve the academic and research outputs of the University.

EDITORIAL DESK

We are pleased to present the second issue of "Infowave," marking a new segment in the services offered by the Brainware University Library. In this issue, we are excited to share the latest news, updates from our library, and a variety of activities involving our students and faculty members. I would like to extend my sincere gratitude to all stakeholders who contributed to this e-newsletter, including our dedicated staff members. A special thank you to our Hon. Chancellor, Hon. Vice Chancellor, Hon. Pro-Vice Chancellor, Hon. Registrar, and all senior members of the University for their unwavering support and encouragement in making the publication of this e-newsletter a reality. In upcoming issues, we will be introducing new features, and we look forward to having innovative ideas. Thank you for being a valued part of our e-Newsletter. We encourage you to share your suggestions and feedback with us.

- Bandana Basu

Message from

Dr. Bhakti Bhusan Barik
Professor & Dean-School of Medical & Allied Health Sciences

It is our great pleasure that Vol. 1, Issue No. II BWU Library e-Newsletter, "Infowave" will be published very soon. It covers the information about Brainware University Library regarding books, journals, magazines, newspapers etc. Obviously, it will be very useful for students, faculty members, other readers and book lovers. In today's fast-paced world, the importance of staying informed cannot be overstated. As events unfold around us—be it in health science, medicine, the economy or management, law or engineering, science, or culture—it is our responsibility to be in touch with such information. I deeply express my gratitude to the Librarian, Asst. Librarians and other staff members for their efforts to make it successful also thanks to the contributors of messages, articles, drawings and other items.

SHOWCASING "RARE & VALUABLE COLLECTIONS" OF BWU LIBRARY

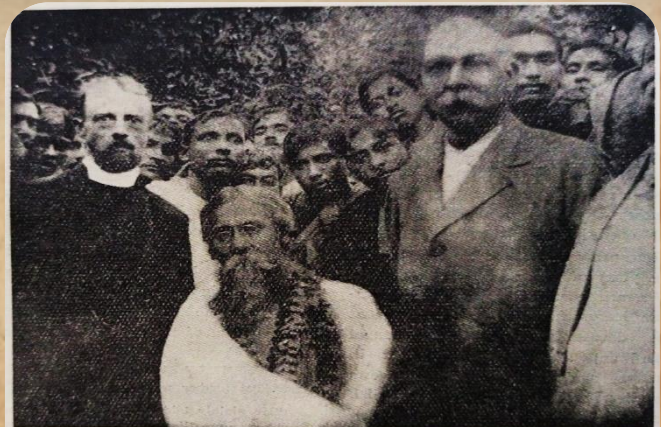

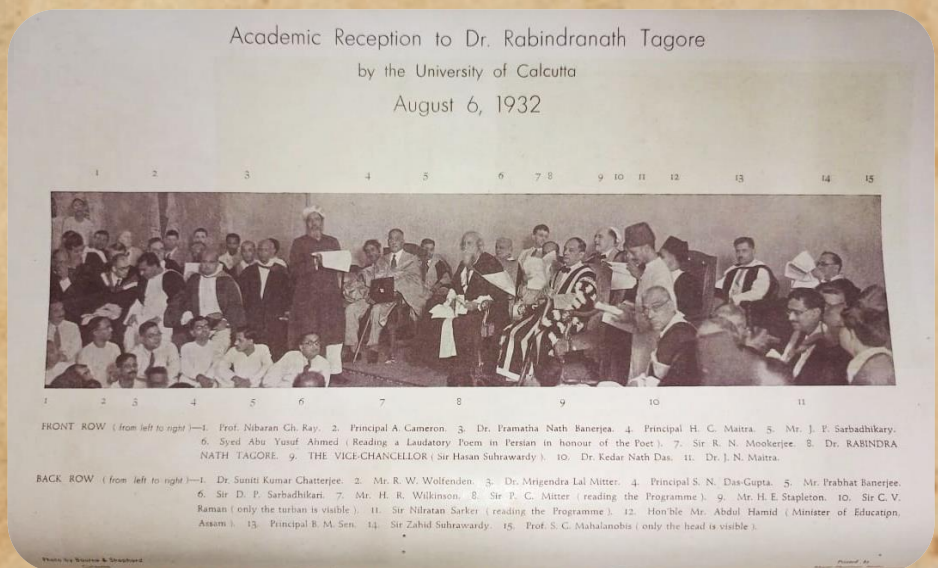

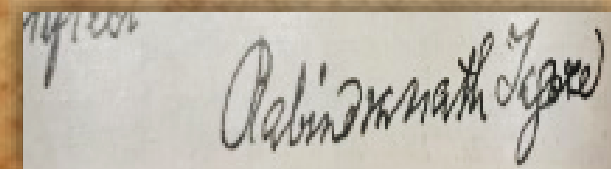

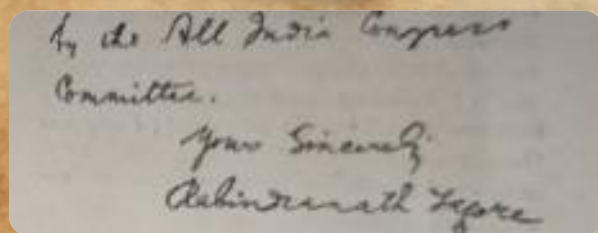

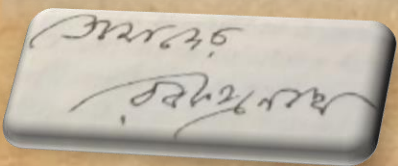

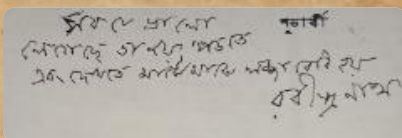

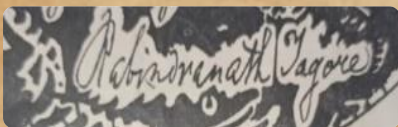

The Calcutta Municipal Gazette: Tagore Memorial Special Supplement

Call no. 891.441 HOM'N41
Acc. No. S/466

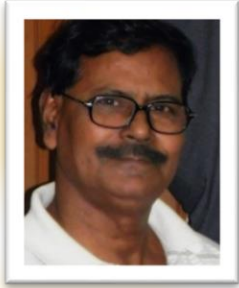

The Calcutta Municipal Gazette, edited by Amal Home, was published by the then Calcutta Municipal Corporation in the memory of Rabindranath on 13th September, 1941. On August 7 of 1941 Gurudev Rabindranath Tagore passed away. The Gazette was published on the life events and memoir of Rabindranath Tagore. There were many photographs and documents of Rabindranath in that Gazette. Also, many scholars wrote about Rabindranath in that Gazette. The Gazette contained many letters written by Rabindranath and many photographs with autographs of Tagore. Some of the paintings of Rabindranath Tagore were published in it. In 1932, the University of Calcutta awarded Honourary Doctoral Degree of Literature to Rabindranath Tagore. The Gazette also enriched with many rare photographs of Rabindranath Tagore's family and family members.

Brinware University Library is proud to have a copy of this rare Gazette in their Rare and Valuable Collections.

For the Students, by the Students

MY FIRST DAY AT BRAINWARE UNIVERSITY

“

As the years passed by, we have finally crossed the threshold of school life and started a into a new journey called "university life". As our whole childhood surrounded in the school boundaries, our adulthood will become surrounded with university and career. I have joined in B.Sc. Nursing course in the university and being a nursing student, I have to stay at the hostel apart from my family from the first time. I shifted to my hostel and was feeling very excited, nervous as well as emotional at the same time as a sudden change that happened in my life. I woke at 6 a.m. in the morning became fresh and ready with my uniform for my first class. I met with many students who all left their home and family and came to study here for their better future and all of us were nervous. We had our orientation about nursing, the rules and regulations of the university and about our subjects. The rules and regulations are very strict and discipline is only main mantra in nursing. We were oriented about the clinical labs, library and classrooms where we will practice and there were patient dummies and equipment like a hospital setting which made me very curious. Our faculties and seniors welcomed us wholeheartedly and they were so sweet and so well behaved. We all have introduced ourselves in the class through which we get to know about each other. I made a bunch of friends which I have not expected and they were very friendly. It is natural to feel nervous on the first day but everything has a happy ending and that's why I say my first day in university was very good.

Memorial Plaque of Pandit Ishwar Chandra Vidyasagar at Nimtala ‘Maha Shmashana’

Sayan Banerjee

Jr. Library Assistant
Brainware University
Library

Nimtala Crematorium also known as Nimtala Burning Ghat is located between Bidon Street and Stand Road in Kolkata on the bank of Ganges. There is a plaque commemorating the great Bengali scholar, educationist, social reformer and the progenitor of “Barno Porichoy”, Ishwar Chandra Vidyasagar (26th September, 1820-29th July, 1891).

The contribution of Pandit Ishwar Chandra Vidyasagar especially in the world of Bengali language is unquestionable. Vidyasagar was born on 26 September 1820 in Birsingha village of the then Hooghly district (which is now in West Midnapore). He has done many scholarly works on Bengali language and literature, and many revolutionary works for the Bengali society. After completing his primary education in the village, he came to Calcutta with his father Thakur Das Bandopadhyay for higher education. “Barno Porichoy” is his creation. Ishwar Chandra Vidyasagar remains a neglected personality to the then Bengalis and Bengali society. The Bengali society and the “Brahmo” society at that time insulted him. He took the initiative for the first widow remarriage in Bengal and the groom was his own son, Narayan Chandra Bandopadhyay, and the bride was a Bengali Widow. Vidyasagar arranged this marriage to set an example to the society. For this, his family rejected all good relations with him. Not only his family but the society also isolated him after this incident. Even his relationship with his son was severed. His son Narayan Chandra Bandopadhyay renounced all ties with Vidyasagar. Despite this, Vidyasagar was not distracted from his duty to the society and his thought of formation of an educated Bengali society. In Later life, when Vidyasagar fell ill and became bed-ridden, his son held Bidyasagara's feet and begged for forgiveness. Vidyasagar was so kindhearted that he forgave his son. This great personality left this eternal world on 29th July 1891. Even after his death, the society has started to think that “Apad” (bad man) was gone and did not stop insulting him.

Vidyasagar was cremated at Nimtala “Maha Shasnan”. A memorial plaque was founded after 129 years of Vidyasagar’s death, in 2020, by the Indian Association (Bharat Sova). Vidyasagar was the founding member of Indian Association. The memorial plaque was placed on a tomb right next to the statue of “Biswa Kabi” Rabindranath Tagore.

The memorial plaque should have been placed much earlier but, I personally have doubt that not many people can identify him by looking at that plaque. If you ever visit this place, stand in front of this plaque and remember that great Indian philanthropist, who fought till his last breath for those who were socially marginalized.

Image collection: The author himself took this picture from Nimtala Maha Shmashana.

Book Review

'A THERAPEUTIC GARDEN'

Authored by Sanchari Talukdar, Sourav Kabiraj, Rabisankar Bag, Sneha Roy
ISBN 974-81-19818-61-7

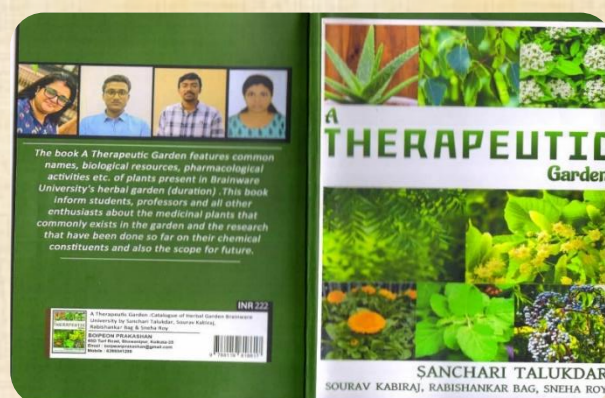

Ananya Bhowmick
Assistant Professor
Dept. of Pharmaceutical
Technology
Brainware University

"A Therapeutic Garden," authored by Sanchari Talukdar, Sourav Kabiraj, Rabisankar Bag, and Sneha Roy, is an invaluable resource that documents the medicinal plants within Brainware University's medicinal garden. This book offers a meticulous catalogue of plants, providing key details such as biological names, family classifications, descriptions of phytoconstituents, and pharmacological uses. For students, researchers, and botanical enthusiasts, this guide presents an in-depth look at the therapeutic potential of a diverse range of plants. One of the book's standout qualities is its structured and thorough approach. Each plant entry includes not only taxonomic information but also specific insights into the chemical constituents responsible for the plant's medicinal effects. This scientific depth, particularly concerning phytoconstituents, makes the book highly valuable for those studying pharmacognosy or working in fields like herbal medicine and natural product research.

I would like to thank specially to the library of Brainware University for taking the initiatives to publish the book which created a significant academic and practical relevance.

The pharmacological applications listed for each plant add further value, making the book useful beyond simple identification or botanical study. Readers can see the clinical and therapeutic implications of these plants, including their potential uses for conditions such as inflammation, microbial infections, and antioxidant support. This combination of botanical information and pharmacological relevance elevates the book as both a scientific resource and an educational tool.

While the book is highly informative and thoughtfully organized, some printing issues have been noted, affecting the presentation of information on certain plants. These inconsistencies, though minor, can be distracting for readers seeking clear and uninterrupted data. For instance, some sections may have minor misprints or formatting errors, which could be clarified in future editions. Although these issues do not significantly detract from the content's value, they do impact the reader's overall experience. Despite this drawback, "A Therapeutic Garden" remains an accessible and comprehensive guide, making complex scientific information available in a straightforward and engaging format. The language is clear, allowing even common readers of various backgrounds to benefit from the wealth of information on medicinal plants. Additionally, "A Therapeutic Garden" is a rich and informative text that highlights the medicinal diversity within Brainware University medicinal garden. Despite minor printing issues, the book is an essential addition to the library of anyone interested in plant-based medicine, pharmacognosy, or botany. It stands out as both a practical resource and an inspiring reminder of nature's therapeutic potential.
