

Knowledge will make us free. This is the idea of Jnana-Yoga: knowledge will make us free! What knowledge? Chemistry? Physics? Astronomy? Geology? They help us a little, just a little.

- **Swami Vivekananda** (*A Jnâna-Yoga class delivered in New York, Wednesday, December 11, 1895, and recorded by Swami Kripananda*)

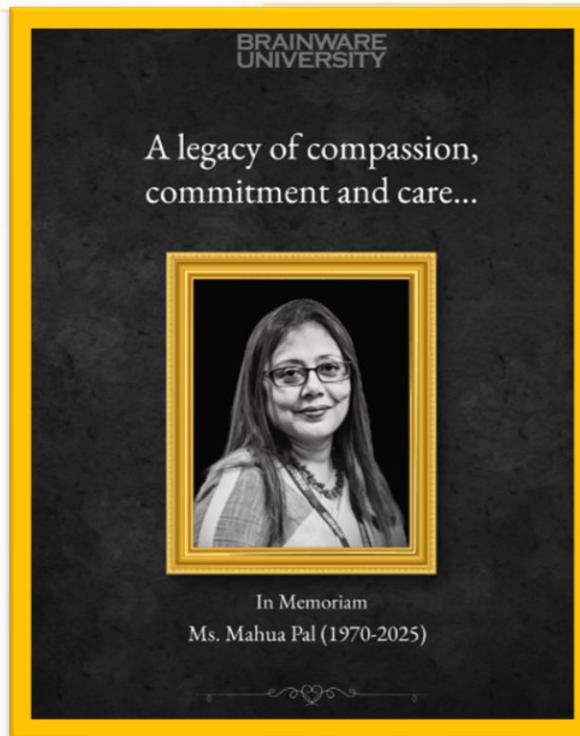

Bandana Basu
Editor & University Librarian

Welcome to this edition of the library e-newsletter “**InfoWave**”- volume-2, issue-2!

Our newsletter publishes all the updates related to the University library, ensuring that students, faculty, and staff remain well-informed. In addition to highlighting library developments and staff achievements, we take pride in showcasing student talent. We invite and request everyone to follow this e-newsletter of BWU Library. We look forward to your continued cooperation and contributions as we grow this resource together.

I want to sincerely thank all of the stakeholders who helped with this e-newsletter, especially our library staff members. Sincere gratitude is extended to our Honourable Chancellor, Honourable Vice Chancellor, our Registrar, and all other senior officials of the University for their constant support and encouragement in making this e-newsletter a reality.

Your valuable feedback and constructive suggestions will enrich this e-newsletter even further in the future. Thank you for being a part of BWU Library and a valued reader of our e-newsletter, **InfoWave**.

Editorial

ABOUT THE BWU LIBRARY

The Brainware University Central Library is a knowledge resource centre which houses a huge number of books, national and international journals, magazines, project reports, Govt. reports, subject dictionaries, fiction and non-fiction books, biographies, rare & valuable books, manuscripts, career guide books, ready references, Theses & dissertation and previous years' question papers etc. With extensive cataloguing and written down records, students are provided a vast and user-friendly index to choose from.

The library of Brainware University has also initiated four other wings for focusing on four particular disciplines, namely, Dept. of Pharmaceutical Technology Library, School of Law Library, Institute of Nursing Library and Dept. of Allied health science Library. The Central Library along with these four department libraries hold an overwhelming collection of resources.

Recognition for BWU Library

Honouring Excellence in Digital Learning: Brainware University Awarded at IIT Kharagpur

Organised by: National Digital Library of India (NDLI) and Central Library, IIT Kharagpur

Date: 3rd – 5th November 2025

Venue: Indian Institute of Technology (IIT), Kharagpur

It is a matter of great pride and honour for **Brainware University** to be recognised as one of the **Top Performing NDLI Clubs in India** for the academic year **2024–2025**. This distinguished honour was conferred by the **National Digital Library of India (NDLI)** in appreciation of the University's consistent dedication to promoting digital literacy and facilitating meaningful engagement with digital learning resources.

In recognition of this achievement, Brainware University was invited to participate in the **4th International Symposium on Knowledge Engineering for Digital Library Design (KEDLD-2025)**, jointly organised by the **NDLI and the Central Library, IIT Kharagpur**, from **3rd to 5th November 2025** at IIT Kharagpur.

Ms. Bandana Basu, University Librarian, represented Brainware University at the symposium. During the event, the University was **presented with the Top Performing NDLI Club Award on 4th November 2025** in a special ceremony held at IIT Kharagpur.

This achievement highlights Brainware University's continued commitment to advancing digital knowledge, encouraging the effective use of online academic resources, and empowering students and faculty through the NDLI Club platform. The University pledges to continue supporting the vision of the **National Digital Library of India** in creating a digitally empowered academic community.

Gandhi's Emissary

- By Sudhir Ghosh

Sudhir Ghosh's "Gandhi's Emissary" provides a poignant memoir detailing his role as a key intermediary between Mahatma Gandhi and the British Labour government during the critical years of 1945-1947. The book highlights Ghosh's effective communication with influential figures such as Clement Attlee and Stafford Cripps, often bypassing bureaucratic hurdles to relay urgent messages that the Congress could not.

Beyond its political narrative, the memoir deals with the personal tragedies of the period, notably the growing estrangement between Gandhi and his successors, Jawaharlal Nehru and Vallabhbhai Patel. Ghosh illustrates Gandhi's loneliness as he witnessed his vision of India being compromised in the face of Partition. The text further critiques the failures of post-independence foreign policy, with Ghosh recounting his diplomatic mission to the United States, where he sought military assistance from President John F. Kennedy in light of the Sino-Indian tensions leading to war in 1962.

Ultimately, the memoir presents a nuanced, humanized account of India's struggle for independence, shedding light on the private conflicts and alliances that influenced the formation of modern India.

Institute of Nursing

It has been almost two years—how time flies. I still remember the day I first stepped into Brainware University. From the very beginning, the university library became a truly memorable space for me. As a member of another library, this was the second time I had the opportunity to be part of such an enriching academic environment. On my very first day, the librarian graciously issued us our membership cards and carefully explained the rules and regulations of the library. For any book lover, the familiar smell of books evokes a deep sense of nostalgia, and that day I felt completely immersed in memories of my earlier library experiences. I entered the library in search of my passion and discovered my profession beautifully intertwined among the shelves of books. Gradually—what we might call an interpersonal relationship in academic terms—a deep bond formed, not only with the books but also with the devoted library faculty. Receiving the Library Appreciation Award remains one of the most cherished blessings of my life. I am deeply grateful to Brainware University for giving me the wings to grow, find solace, and receive constant support amid a busy academic schedule.

DID YOU KNOW!!

1. Who is Awarded Nobel Prize for Economic Sciences in 2025?
2. Who is Awarded Nobel Prize for Peace in 2025?
3. Who is Awarded Nobel Prize for Literature in 2025?
4. Who is Awarded Nobel Prize 2025 for Chemistry?
5. When was the Nobel Prize first awarded?
6. Who won the Nobel Prize in Physiology or Medicine in 2025?
7. Who won the Nobel Prize in Physics in 2025?
8. What are Nobel Prize Categories?
9. Who was the first Indian to receive the Nobel Prize?
10. How many Indians received the Nobel Prize so far?

ANSWER

**Answer of "Did you Know",
Vol.2 Issue No. 1**

- *Who said "Learn from yesterday, live for today, hope for tomorrow? The important thing is not to stop questioning"?*
- *Who said "No one is useless in this world who lightens the burden of it to anyone else"?*

History of DRDO Library

Sayan Banerjee
Library Assistant
Brainware University
Library

DRDO (Defence Research and Development Organization), this organization started its journey in 1958. It was originally established to secure, strengthen and make the defence system of our country stronger. It makes all kinds of missiles, nuclear bombs, etc. It is currently known as a science and technology centre. Although it was established in 1958, the library of DRDO was started in 1948 and in 1959 it became a department of SIB (Scientific Information Bureau). On 29th July 1970, DRDO became a laboratory. This library still has 262,000 documents, which are used for research by scientists. All these scientists strengthen the security system of our country through research. This library also provides various databases. DRDO and DESIDOC (Defence Scientific Information & Documentation Centre) have completely digitized research papers so that researchers can-do better-quality research. The more advanced research our country's researchers do, the stronger our country's security system will be. At present, DRDO has become the backbone of our country's defence system. DRDO's success and fame have spread all over the country. Behind this, our scientists and all those engineers working in DRDO have worked tirelessly for the country. DRDO's library data, documents, various online databases. With its help, our country's scientists have made our country's defence system more advanced and stronger day by day.

The screenshot shows the homepage of the DRDO eLibrary. At the top, there is a header with the Government of India logo, the text 'Government of India Defence Research and Development Organisation', a search bar, and the DRDO logo. Below the header, there is a navigation menu with links for 'Home', 'Organisation', 'Offerings', 'Documents', 'Resources', and 'Connect'. The main content area features a large image of various military equipment like tanks and aircraft. Below the image, there is a breadcrumb navigation 'Home / E-Library' and a list of links: 'DRDO eLibrary Portal for e-resources' and 'DRDO eLibrary Instruction Manual'.

The history of medicine spans 10,000 years and highlights humanity's determination to overcome physical limits. It has developed from prehistoric practices to precise robotic techniques. To understand modern healthcare, we need to follow these historical steps as our ancestors sought to understand life and death.

The Primitive Era: Magic, Instinct, and the First Incisions

In early medicine, there was no distinction between healing and religion. Illness was often seen as a supernatural curse or a punishment from the gods. As early as 10,000 BCE, people performed trepanation, where they drilled holes in skulls to free "demons." Evidence of bone healing shows that many patients survived these risky procedures. Early healers also created a "global pharmacopeia" by using plants like poppy for pain relief and clay for skin problems.

The Pre-Christian Era: The Rise of Great Civilizations

Different civilizations contributed in the medical sciences at a great impact. Ancient civilizations like Egypt, Indian, Chinese had the tremendous contribution in the development of modern drug and surgery system.

- I. Ancient Egypt: The Edwin Smith Papyrus documented medical practices and recognized that the heart acted as a distribution centre while the brain-controlled movement.
- II. Mayan civilization: Surgeons in Mesoamerica used obsidian blades, which were sharper than modern steel, and sutured wounds with human hair.
- III. Ancient Greece: Hippocrates moved medicine toward a more rational approach, arguing that diseases had natural causes. His theory of the Four Humours introduced homeostasis, an idea still important in medicine today.
- IV. Ancient Rome: The Romans focused on public health, creating sewers like the Cloaca Maxima and building aqueducts. They also established the first military hospitals and a system for triage.
- V. India and China: Sushruta, around 600 BCE, wrote about over 300 surgical procedures, including rhinoplasty with the "Indian Flap" technique. In China, variolation, a precursor to vaccines, was introduced, and Artemisinin was discovered to treat malaria.

The Era After Christ (AD): From the Middle Ages to the Renaissance

Islamic scholars such as Ibn Sina and Al-Zahrawi preserved ancient medical knowledge. Al-Zahrawi notably discovered catgut for stitches. During the Renaissance, Andreas Vesalius created the first accurate map of human anatomy, while William Harvey uncovered how blood circulates, demonstrating that the heart functions as a pump.

The 1800s: The Triple Revolution like Anesthesia in 1846 ended pain during surgery; Germ Theory in the 1860s identified microorganisms as causes of infection; and Antisepsis in 1867 established sterile environments in hospitals, cutting mortality rates from 50% to nearly zero.

In the 20th Century, The discovery of Penicillin in 1928 marked the end of the era dominated by bacterial infections. Advances in medical imaging, like X-rays and MRIs, allowed doctors to examine the body without surgery. The 1953 discovery of the DNA double helix shifted the focus of medicine to the molecular level.

The Modern Era: The Frontier of Data and Genetics

Today, we are in the age of Personalized Medicine, where gene editing holds the potential to eliminate hereditary diseases. With robotic surgery and AI-based diagnosis, modern healthcare is a collective effort that merges ancient surgical techniques and drug principles with cutting-edge technology. All the thanks to the year after year, impactful research of the mankind and eager of knowledge of human.
