

Gravita India Limited – Driving Sustainability Through Recycling

Nagendra Kumar M V* and Indu Perepu**

Gravita India Limited (GIL), one of India's leading and reputed recycling companies, grew to have a global presence with various waste sourcing and manufacturing units. With a thirty-year history in the industry, the company has built up a core competency in developing innovative technologies for recycling various metallic wastes like lead and aluminum and plastics. The in-built technology enabled the company to produce quality products from recycled waste and increased the lifetime of the recycled waste. The company owns a well-diversified portfolio of recycled products and services developed from lead, aluminum, and plastic scraps. It has developed strategic objectives built around the core philosophy of sustainability across the value chain based on the fundamental values of fairness, trust, respect, passion, and nurturing relationships.
