Department of Entomology, Kerala Agricultural University, Thiruvananthapuram 695 522, India

Dragon fruit (*Selenicereus* spp.), an emerging fruit crop in India, is increasingly affected by insect pests with the expansion of its cultivation. Infestation by three sucking pests, *Aphis craccivora* Koch, *Ferrisia virgata* Cockerell, and *Halyomorpha picus* Fabricius, was observed on *Selenicereus costaricensis* and *Selenicereus megalanthus* from Kerala.

Keywords: *Aphis craccivora*, *Ferrisia virgata*, *Halyomorpha picus*, Hemiptera, *Selenicereus* spp..
