BRAINWARE UNIVERSITY

Term End Examination 2021 - 22
Programme – Bachelor of Science (Honours) in Animation & Multimedia
Course Name – Video Editing
Course Code - BMMC403
(Semester IV)

Time allotted : 1 Hrs.15 Min.   **Full Marks : 60**

[The figure in the margin indicates full marks.]

Group-A

(Multiple Choice Type Question)   1 x 60=60

Choose the correct alternative from the following :

(1) Technically we can say- Video is a Technology of electronically_____ of audio and visual.

   a) Capturing   b) Recording
   c) Capturing & Recording   d) Editing

(2) What is the full form of 'VHS'?

   a) Visual Home System   b) Video Home System
   c) Video Hour System   d) Video Home Security

(3) What is at the center of video production?

   a) Scripting   b) Editing
   c) Filming   d) Storyboarding

(4) What is the Goal of Editing?

   a) Remove unwanted footage   b) Add effect
   c) Coloring each section of the video separately   d) All of these

(5) Editing is almost an art form because _____.

   a) You have to know what to cut to make people   b) You are trying to cover up the mistakes of the
      look good.   director and camera man.
   c) You are blending together images and sound   d) All of these
      to make a connected piece

(6) When watched by an audience, side by side shots _____.

   a) Tell a story   b) Seem linked
   c) Don't always flow together   d) All of these

(7) The individual video images that make up a moving sequence are called _____.

a) Frames.   b) Assets.

c) a. Clips.   d) Sequence

(8) In which stage do you EDIT your video?

a) Production   b) Pre-Production

c) Post-Production   d) None of these

(9) What is a STORYBOARD?

a) The idea or plan for the flow of the video   b) A story

c) Something that you draw in a paper   d) Video shot

(10) Which stage is the "planning stage"?

a) Production   b) Pre-Production

c) Post-Production   d) None of these

(11) Which of these is an example of a post-production effect of video editing software?

a) Color corrections   b) Adding title screens

c) Adding music   d) All of these are examples of post-production effects of video software.

(12) What should always be considered when framing a shot?

a) sound   b) shot list

c) battery power   d) rule of thirds

(13) Where can you view your editing progress in the video software?

a) timeline   b) video clips

c) editing effects folder   d) file folder

(14) What is the term used to describe keeping specific elements the same throughout production?

a) double check   b) repetitive

c) continuity   d) shot list

(15) A video project usually starts with an outline and a _____ that describes the action.

a) story edit   b) flow chart

c) storyboard   d) line chart

(16) The term Video is derived from a Latin word which means _____.

a) " See"   b) "I See"

c) "You See"   d) None of these

(17) Video are used for_____.

a) Entertainment   b) Education

c) Web   d) All of these

(18) Video editing is the process of _____ and _____ video shots to create a new work.

a) manipulating   b) rearranging

c) manipulating & rearranging   d) None of these

(19) Video is a Technology of electronically _____.

a) Capturing   b) Recording

c) Storing   d) All of these

(20) _____are also used in the film industry and in the animation industry, where they are sometimes called "cels."

a) Photo   b) Model

c) Frames   d) Audio

(21) What editing software did Adobe create?

a) Premiere   b) Final cut Pro

c) AVID   d) Pinnacle studio

(22) What does a video's "aspect ratio" represent?

a) The numerical fraction representing the number of pixels per inch

b) The width - to - height ratio of an image or frame.

c) It is a wide picture format for film

d) It is the name for the outer edges of a video image that are typically cut off by consumer television

(23) The television format used most commonly the United States is _____.

a) PAL   b) AVI

c) MPEG   d) NTSC

(24) To convert from one video compression format to another is also called_____.

a) Transcode.   b) Transcription.

c) Render.   d) Rename.

(25) A nondestructive compression scheme that retains all the original file information and does not degrade sound or video quality is known as _____.

a) Lossless.   b) Lossy.

c) Codec.   d) Exportive.

(26) What is a "codec?"

a) High-speed interface used for connecting DV camcorders to computers and disk drives.

b) They are Large-capacity storage drives for audio and video files.

c) Firewire is used in the recording process to decompress the original video data.

d) Used to view and hear broadcasts, and to interactively play and seek in stored clips.

(27) Full form of MPEG_____.

a) Moving Picture Experts Group   b) Motion Pictures Expert Group

c) Move Pictures Expert Group   d) None of these

(28) .mp3 is a a file extension and file format that is used for _____.

a) High-definition widescreen film.   b) Audio files.

c) Digital files.   d) Web-based multimedia

(29) The amount and rate of data that can be processed or transmitted by a given device is called _____.

a) Transference.   b) Data rate.

c) Bandwidth.   d) Compression

(30) Adobe Premiere, Apple iMovie, and Microsoft Windows Movie Maker 2 are examples of _____.

a) video editing software.   b) presentation software.

c) graphics software.   d) digital camera software.

(31) When sound is digitally edited, it is said to be _____.

a) rerecorded.   b) animated.

c) analoged.   d) digitized.

(32) The NTSC time code format in which 2 Frame counts are skipped per minute is called_____.

a) Drop Frame
b) Non-drop frame
c) Key frame
d) None of these

(33) What is the standard frame rate for NTSC Television?

a) 29.97 frames per second
b) 24 frames per second
c) 16 frames per second
d) 25 frames per second

(34) The dimensions in pixels of a 16:9 1080p High definition frame are...

a) 720 x 1080 pixels
b) 1280 x 1080 pixels
c) 1920 x 1080 pixels
d) None of these

(35) What is the frame rate for PAL?

a) 29.97 frames per second
b) 24 frames per second
c) 16 frames per second
d) 25 frames per second

(36) What does PAL stand for?

a) Phase Alternating Line
b) Phases Alternate Line
c) Phaeton Alter Lines
d) None of these

(37) _____ - is usually known as HD

a) 7680 x 4320
b) 1920 x 1080
c) 1280 x 720
d) 2560 x 1440

(38) _____ - is usually known as FHD or "Full HD" resolution

a) 7680 x 4320
b) 1920 x 1080
c) 1280 x 720
d) 2560 x 1440

(39) _____ - is commonly known as 4K, UHD or Ultra HD resolution.

a) 3840 x 2160
b) 1920 x 1080
c) 1280 x 720
d) 2560 x 1440

(40) What is the full form of CCD?

a) Charged-coupled device
b) Chance coupled device
c) Change coupled device
d) None of these

(41) Which kind of a video Scan Rates Utilizing Two Alternating Fields Per Single Frame ?

a) Interlaced
b) Non- Interlaced
c) Online
d) Offline

(42) _____ scanning is simply displaying alternating sets of lines.

a) Interlaced
b) Transmitted
c) Non- Interlaced
d) Analog

(43) _____ technique captures one entire image per frame

a) Interlaced
b) Transmitted
c) Non- Interlaced
d) Analog

(44) On increasing the speed of a clip, its duration_____.

a) Increases
b) Stays the same
c) None of these
d) Decreases

(45) Where we can see the edited video in Adobe Premiere?

a) Timeline window
b) Monitor window

c) Effects control window   d) Effects window

(46) The first attempt at editing a movie is the

    a) Production Cut   b) Fast Cut

    c) Rough Cut   d) Final Cut

(47) What is the purpose of the timeline?

    a) The timeline is tells the time within the editing software   b) It is the tool that is used to edit your video

    c) The timeline is used to indicate the length of each shot   d) None of these

(48) Which one of the following is not a Fixed effect?

    a) Motion   b) Opacity

    c) Brightness and Contrast   d) Volume

(49) How is a video rendered?

    a) Once the video is saved, it is rendered automatically   b) Click enter from keyboard

    c) Right-click on the clip and select 'Render'   d) None of these

(50) We can change duration and speed of a clip with the help of

    a) Pen tool   b) Extract

    c) Rate stretch tool   d) Over write button

(51) The final edit has to be _____.

    a) Sampled   b) Quantized

    c) Interlaced   d) Exported

(52) Cutting down the size of a video clip is known as

    a) Clipping   b) Cutting

    c) Cropping   d) Trimming

(53) The _____ Monitor can be used to playback and preview individual clips.

    a) Program Monitor   b) Source Monitor

    c) Multi camera Monitor   d) None of these

(54) There's a special name for the number countdown (5-4-3-2-1) that you see before an old movie starts. What is it called?

    a) Countdown.   b) Preroll.

    c) Counting Leader.   d) Master.

(55) What does it mean to "dub" your audio or video project?

    a) To duplicate, or make a copy, of the project.   b) Process used in video production to record synced voice.

    c) To store, or backup, the master copy.   d) None of these

(56) What is the difference between "mono" channel and "stereo" channel sound?

    a) "Mono" is a compressed format and "Stereo" is a lossless format.   b) "Mono" is only used for web videos and "Stereo" is needed for high-definition videos.

    c) "Mono: is a single channel and "Stereo" is two channels--a left and right channel.   d) There is no difference

(57) What does "Hz" or Hertz represent?

    a) It represents the file size of an audio file.   b) It is a measurement of the audio sampling rate.

c) It is a file naming extension of a raw audio file.

d) It is the name of an auto rental company.

(58) When you are assembling a collection of clips into a production with multiple overlapping tracks, you are working in the_____.

a) Timeline

b) Monitor

c) EDL

d) None

(59) The time display row along the top of the timeline, showing the time code along the production is called the:

a) Source monitor.

b) Edit line.

c) Time ruler

d) Bin.

(60) To generate a video production in its final form, including transitions, effects, and superimposed tracks is called:

a) Finalize.

b) Store.

c) Render.

d) Compress.
