■ **NITI Aayog Makes Public Data Accessible for All**

NITI Aayog launched the National Data & Analytics Platform (NDAP) for open public use on 13th May. The platform aims to democratize access to public government data by making data accessible, interoperable, interactive, and available on a user-friendly platform. It hosts foundational datasets from various government agencies, presents them coherently, and provides tools for analytics and visualization. NDAP follows a use-case based approach to ensure that the datasets hosted on the platform are tailored to the needs of data users from government, academia, journalism, civil society, and the private sector.
